Flavor-Seal

A Superior Quality Silage Film

Manufactured By

Σ Sigma Stretch Film
Our Product is Stretch Film, Our Strength is Our People

Flavor-Seal

A Superior Quality Silage Film

Manufactured By  **Sigma Stretch Film**
Our Product is Stretch Film, Our Strength is Our People

Flavorseal (1mil)

The Flavorseal (1mil) is our standard bale wrap (and is our # 1 seller) It works well on individual round bale wrapping, and inline wrapping. The 30", 1mil has approx. 5000 feet per roll (which is your standard length)

Good

Performance 5 (1mil)

The Performance 5 is produced with a 5 layer extrusion process, which allows greater flexibility for consistent quality, and performance. If you are wrapping stemmy hay, or in warmer weather, this film will stand out for its high puncture, and tear resistance, compared to the standard films. On this film, the 30", 1mil has approx. 5000 feet per roll, so, for a little higher price per roll, you are still able to wrap the same amount of bales with each roll, as the standard 1mil Flavorseal.

Better

Ultra 5 (1mil)

The Ultra 5 is also produced with a 5 layer extrusion process, plus it is made with a new special resin technology, making it one of the highest quality films on the market. **Ultra 5** is the perfect film to wrap individual big square bales. The dry sharp stems are no problem for Ultra 5 toughness, neither are the pulling forces that occur during the high speed wrapping process!! The 30" film also has approx. 5000 feet per roll.

Best

The thicker films below, were more popular, prior to having the 5 layer films available. Since you are getting less footage per roll, on these thicker films, you will not be able to wrap as many bales per roll of film. We do not recommend putting less layers per bale, since the bale will seal better with more layers. (oxygen will not pass through the plastic as soon, as in between the layers)

Flavorseal (1.2mil) is the same as our standard Flavorseal, but is a thicker film. With it being 20% thicker, there is approx. 4,100 feet per roll.

Flavorseal (1.5mil) is the same as our standard Flavorseal, but is a thicker film. With it being 50% thicker, there is approx. 3,300 feet per roll.

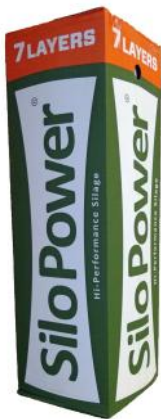

Silopower

The Leaders in Bale Wrap
Made in Europe

Silopower

*The Leaders in Bale Wrap
Made in Europe*

Silopower

The Silopower is a 7-layer, Hi-Performance wrap. When it comes to an Imported wrap, this is a good choice.

High tear and puncture resistant, makes excellent bale sealing.

This film has been on the market for years, with excellent results!

Available in 20" and 30" width. Color: white (1mil thickness)

Silopower Extra *The Next Generation*

The Silopower Extra is also a 7-layer film. It is a lighter, but stronger film with an Extra 10% feet per roll! (Compare the savings)

This film can be used on both round and square bale wrapping.

It is forecasted that most bale wrap manufacturers will develop a thinner and stronger film in the future.

Available in 30" White (.9 mil thickness)

Magnum

Magnum is a multilayer Black bale film, designed to be used on dry forages, or for late season high moisture wrapping.

Available in 20" and 30" width. Color: Black (1mil thickness)

Dutch Harvest and Tyrite Sisal Twine

Available in Green or Gold

Round Bale Twines

16,000 treated

16,000 untreated

use untreated when wrapping hay, treated sisal will disintegrate the plastic.

Small Square Bale Twines

9000 use on regular bales

7200 ideal for kicker and thrower balers, or to make heavier bales

10,000 for light duty bales

Binder Twines

6 spools/pack

20,000 heavy duty

26,000 regular

Tyrite Baler Twine

Tie it Right With Tyrite

20000/110 Single Ball

Round Baler Twine

20,000/110 SB is used in round balers. This has 20,000 feet all in one spool.
Available Colors: Blue or Red

20000/110 Double Ball

20,000/110 DB is the same twine as above, except it has two spools with 10,000 feet per spool, banded together.
Available Colors: Blue or Red

20000/110 Solar Degradable

20,000/110 SB Solar Degradable is designed to start breaking down after it is exposed to sunlight, for a period of time.

Big Square Baler Twine

4000/440

4000/440 Tyrite is a good choice for the mid size big square balers. It is not recommended for the High Density balers.
Available Colors: Blue or Red

4000/350

4000/350 Tyrite is commonly used for lighter bales, and can also be used on the Bale Baron machines.
Available Color: Blue

Tyrite Baler Twine

Tie it Right With Tyrite

Tyrite Baler Twine

Tie it Right With Tyrite

9000/138

Small Square Baler Twine

9000/138 is a light duty twine that can be used when making light bales. It is not recommended for kicker or thrower balers. Can be hard on hands when handling bales, because of smaller diameter twine. Available Colors: Blue or Red

9600/170

9600/170 is a medium duty twine. Can be used as an all purpose twine. This unit has two-4800 ft. spools banded together. Most balers can be switched from sisal to this twine, without making any adjustments. Available Colors: Blue or Red

8500/170

8500/170 is the same twine as above. The advantage to using this one is, you have 8500 ft. all in one spool! Therefore, you do not need to change spools as often, and you have less knot going through your baler. Available Colors: Blue or Red

7200/170 is also the same as the two above. There is NO benefit to using this twine in the place of the ones above. This was one of the first plastic twines on the market, but has been replaced by the ones above. It has less feet per spool, and have more knots going through your baler. Available Colors: Blue

7200/170

6000/210

6000/210 is a very good twine for kicker and thrower balers. Also can be used on the Bale Baron machines. It is also easier on your hands when handling the bales by hand, and is becoming the most popular twine. Available Colors: Blue or Red

6000/240 is designed for balers that have the ability to make very tight bales. Make sure your baler is capable to handle this heavy twine.. It may need some knotter adjustments. Available Color: Blue

6000/240

Dutch Harvest Poly Twine

(made in Turkey)

Available Sizes

- ◆ 20000/110 DB
- ◆ 20000/110 SB

- ◆ 3000/800 SB

Note: SuperTie twine has out-performed all other twines we have compared it with!!

Magic Blue Netwrap

(by Piippo)

Magic Blue netwrap is also a Piippo product. It is a little thicker netwrap than Hybrid, Therefore, it seems to run better in some machines than the Hybrid.
An Excellent netwrap!!
Blue in color

Available Sizes

48" wide by 10,000' Long
51" wide by 10,000' Long
64" wide by 7,000' Long
67" wide by 7,000' Long

Advantages of The Magic Blue Netwrap

- *UV-Stabilized
- *Easy Lifter, Carry Handles
- *Double End Warning Stripe
- *Easy Coverage System

Hybrid Netwrap

(by Piippo)

Longer - Lighter - Stronger

Available Sizes

48" x 13,200'

48" x 15,100'

51" x 12,100'

64" x 9,700'

67" x 9,000'

Hybrid netwrap has been sold for years here in the US,
and has been performing very well!!

Advantages of The Hybrid Netwrap

- *40% More Feet Per Roll
- *Double End Warning Stripe
- *Easy Lifter Carry Handles
- *Easy Coverage System

Dutch Harvest Netwrap

(made in China)

Advantages of The Dutch Harvest Netwrap

- UV Stabilized For 12 Months Outdoor Storage
- The Last 450' Of Every Roll Has A Warning Stripe
- Environmentally Friendly
- Guaranteed Minimum Length

The Dutch Harvest netwrap is a product out of China, and has performed well for us in the past. It is a heavier netwrap, so your baler needs to have a good cutting system. It holds the bale together very well.

Available Sizes

- 48" wide by 9840' Long
- 51" wide by 9840' Long
- 64" wide by 7000' Long
- 67" wide by 7000' Long

Tama Netwrap

Netwrap for Round Bales

TamaNet™ with TamaTec+™

The Next Generation in Bale Wrap Technology

- **Reliable and consistent.** For a trouble-free baling experience – every time.
- **Edge to Edge™ technology** for perfect bale coverage.
- **Zebra System™.** A clear Left-Right indicator for easy and correct loading of the roll into the baler every time. Plus, at feeding time, user can quickly see which direction to unroll the bale.
- **Red End Warning.** Indicates to the operator that the end of the roll is approaching. The red stripe marks the last 240 ft.
- **Guaranteed Length.** Every roll contains at least the guaranteed stated length, not a “plus-or-minus” average.
- **Carry Handles.** Easier and safer handling.
- **Unique ID Number.** Enables tracing of full production details.

SPECIFICATIONS

Protecting the quality of your feed comes down to a plastic membrane only a few thousandths of an inch thick. But that thin membrane has to stand up to years of rigorous climate while blocking out UV light and resisting punctures and tears. That's why your high quality feed needs all the advanced plastic technology that can be engineered into the film that covers it.

Plastar Silage Bags

Harvest is Protected By Silobolsa

Helpful Hints To Better Bagging

- *Place bag on a hard, well drained, level surface
- *Place bag on machine so label is centered on the side of tunnel
- *With wet forages, do not stretch bag, extra room is needed when feed settles
- *Remember, Over stretching the bag, voids the warranty. "Follow the directions"
- *Vent bags to reduce gas build-up

We normally stock all sizes of 5 mil black and white covers. We make 6 mil plastic available during our early order time, however, during the year we only stock the 5 mil covers.

Advantages

- *Highly Reflective White Side & 100% Black Side Results In Quality Silage
- *Now More Resistant Than Ever To Punctures And Tears
- *UV Stabilized Film Provides One Year Of Life
- *Also Available in Master Rolls

Performance Underlayer

Advantages of Performance Underlayer

Performance Underlayer Film is a 1.6mil clear plastic, that is put between the silage and the polyethylene silage sheet. The film acts as an oxygen barrier and follows the contour of the silage, sealing it much like cling film.

Specifications

Clear 1.6 Mil Thick – Max Width – 60' / Max
Length 2,000'

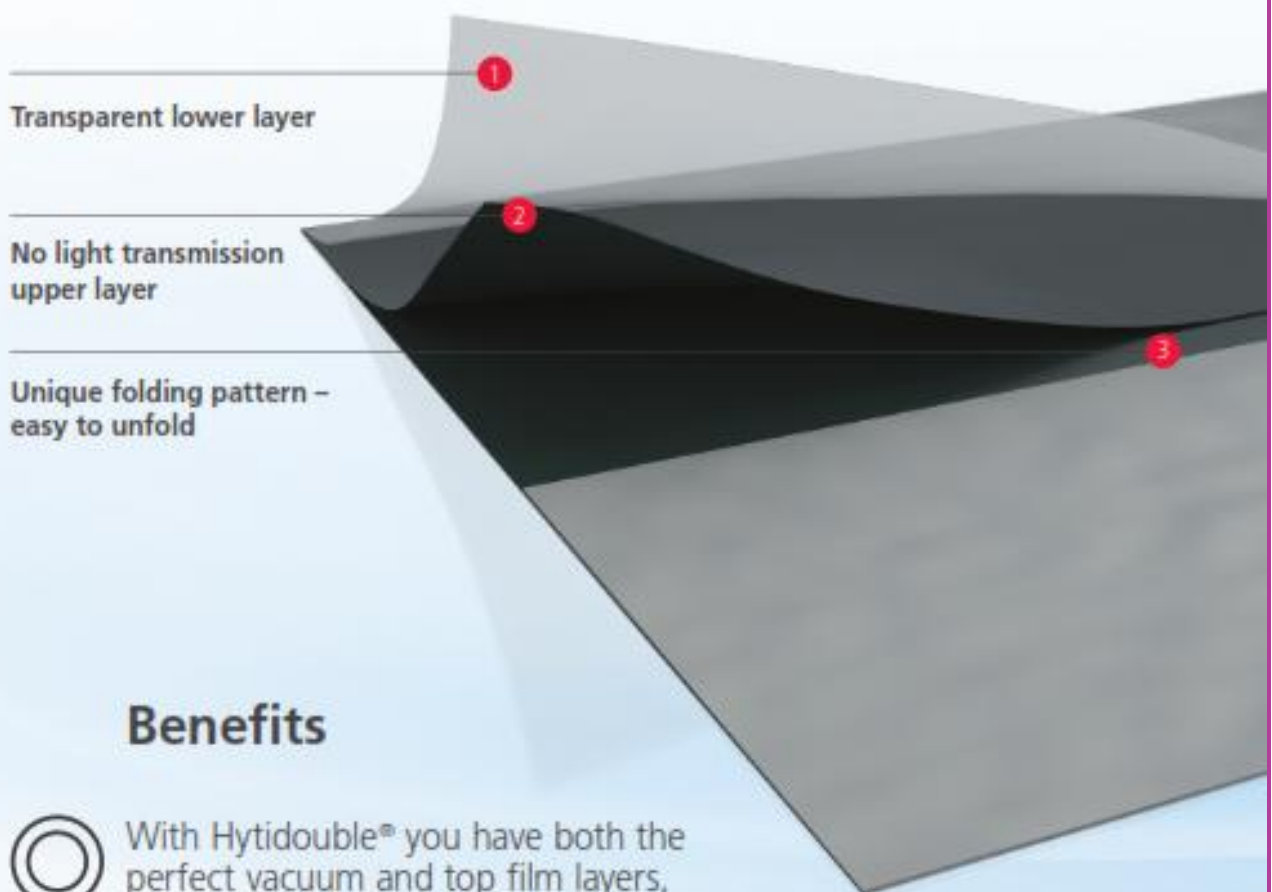

Roll Widths 40 / 50 / 60'

6.6 Mil Hytidouble

5 mil sheeting plus 1.6 mil underlayer

Explore the clever combination
**of cover and vacuum film
on one roll**

Transparent lower layer

No light transmission
upper layer

Unique folding pattern –
easy to unfold

Benefits

With Hytidouble® you have both the perfect vacuum and top film layers, conveniently folded together on one roll

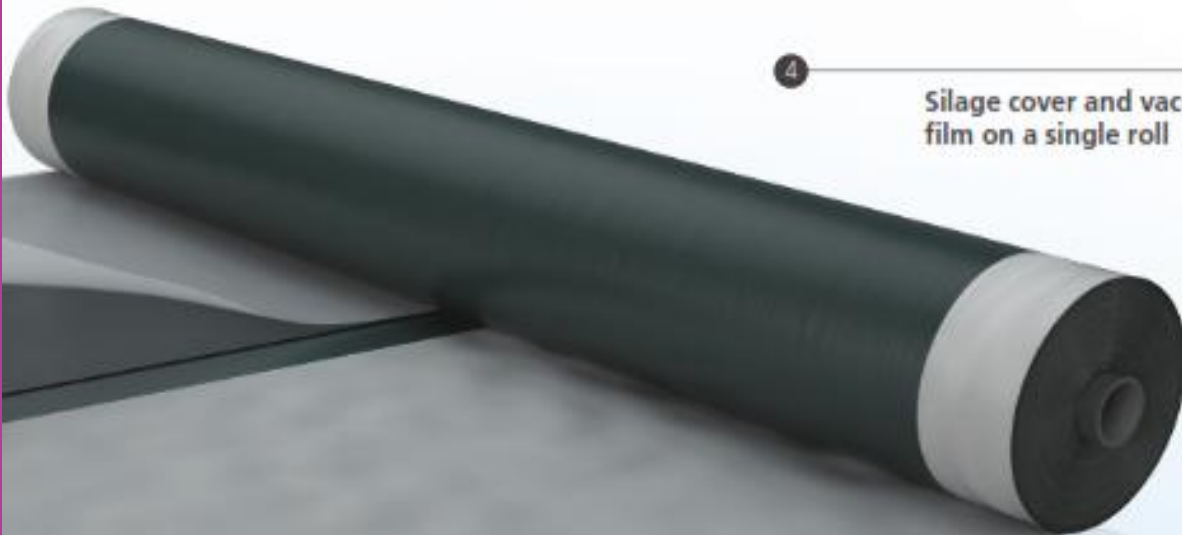

Twice as fast as covering silage using two separate films

By laying the two layers in one movement, you no longer risk punching holes in the under layer

2 in 1 Silage Film

Easy to unfold – Saves time and resources

4 Silage cover and vacuum film on a single roll

5 Durable and supreme quality film

6 Cover the silage bunker in one move

7 Unfolds swiftly and symmetrically

Hay Saver Plus™

68% Buffered Propionic Acid
Liquid Hay Preservative

What are the advantages of Hay Saver Plus™?

- Bale hay at moisture levels up to 30% to reduce leaf shatter.
- Prevents mold and dust (especially on large square bales.)
- Highest percentage of active ingredients. 68% Propionic Acid.
- Contains citric acid to maintain fresh hay smell.
- Contains surfacant to more evenly penetrate hay.
- Buffered product (5.8–6.0pH) is easy on equipment and user friendly.

Tips for using Hay Saver Plus on hay:

1. Avoid baling if the windrow moisture level exceeds 30%.
2. Always check the hay moisture level before baling high moisture hay.
3. For rained-on hay or poorly ventilated storage, increase the application rate by 4–5 lb/ton.
4. Make sure the spray nozzle openings and placement give good coverage.
5. Make sure the storage area for the baled hay is well-ventilated.
6. Do not store untreated dry hay on top of treated wet hay.

Hay Saver Plus packaged in:
480 lb. drums
2400 lb mini bulks

Hay Saver Plus

EPA registered Hay Saver Plus is a buffered propionic acid preservative for processing high moisture hay, corn, grain, silage, haylage and feed blends. Hay Saver Plus is a solution of propionic acid, ammonium propionate, citric acid, ammonium citrate, surfactants, and colorant. The minimum propionic acid content is 68%. Hay Saver Plus also contains 2.50% citric acid. The total concentration of working ingredients is 77.5% — a maximum of only 22.5% water. The pH is controlled at 5.8 to 6.0 with a specific gravity of 1.065 – 1.075 (8.9#/gal).

Application Rate for Baled Hay

Large Square Bales		
Moisture Level	Stem Moisture	Dew Moisture
16–22%	6 lb/ton	3 lb/ton
22–26%	10 lb/ton	8 lb/ton
26–30%	Do not bale	16 lb/ton
Over 30%	Not recommended	Not recommended

Small Square/Large Round Bales		
Moisture Level	Stem Moisture	Dew Moisture
16–22%	4 lb/ton	2 lb/ton
22–26%	8 lb/ton	6 lb/ton
26–30%	16 lb/ton	12 lb/ton
Over 30%	Not recommended	Not recommended

Application Rate for Silage, Haylage & Feed Blends

Crop	Moisture	Rate
Corn Silage	60 – 70%	2 – 3 lb/ton
Small Grain Silage	60 – 70%	2.5 – 3.5 lb/ton
Haylages	50 – 70%	2.5 – 3.5 lb/ton
Feed Blends (Short-term Storage)		2 – 4 lb/ton (increase for greater stability)

Application Rate for Corn

Crop	Moisture	Rate
Shelled Corn	20 – 24%	4 lb/ton
	24 – 28%	5 lb/ton
	28 – 34%	6 lb/ton

Hay Protect

Potassium Sorbate

Hay Protect is a liquid treatment to preserve and protect the quality of grains and forages. **Hay Protect** is a solution of potassium sorbate, sodium benzoate, water, surfactants, and dye. **Hay Protect** is a non-acid based product which is non-corrosive on equipment, environmentally friendly, highly effective and easy to use forage and grain preservative solution. **Hay Protect** is made with food grade ingredients and offers excellent palatability on treated crops.

- * **Non-Corrosive on Equipment**
- * **Environmentally Friendly**
- * **Food Grade Ingredients**
- * **Easy to Use**

Fortress Covers

Protecting your plastic from birds and wildlife

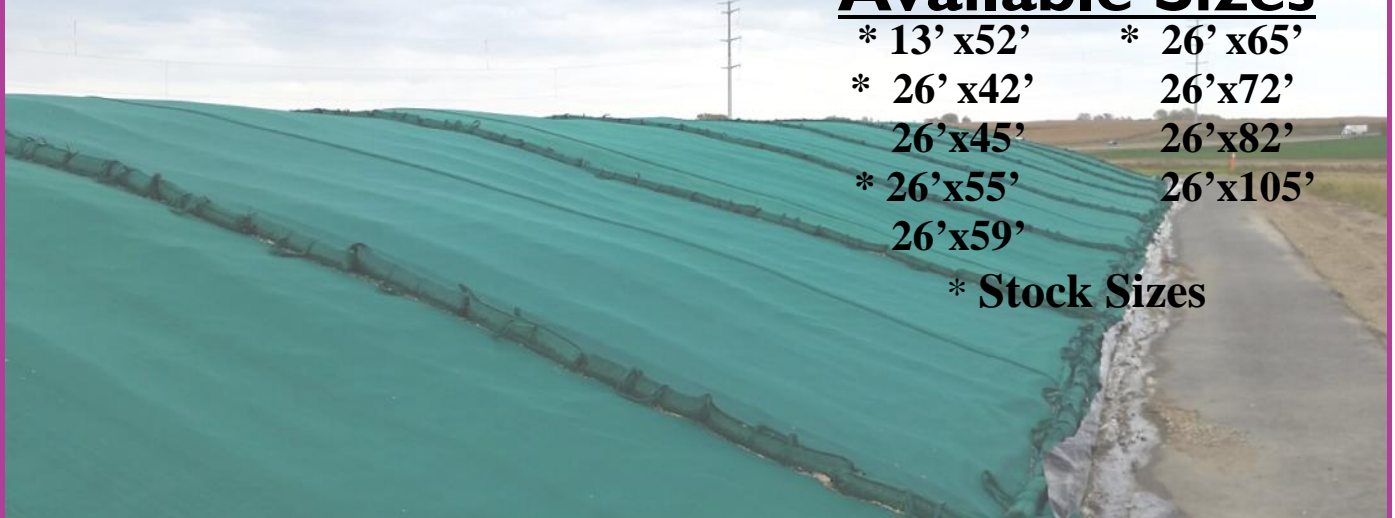

The Fortress Cover is a protective cover placed on top of the silage sheeting, keeping the sheeting in constant contact with the silage. The Fortress Cover eliminates the need to completely cover the pile with tires, saving time and labor. The Fortress Cover gives protection from hail,

birds, deer etc. Fortress Covers may also be used on silage bags or rows of wrapped hay with many different sizes available.

- ◆ 12 Year warranty on UV degradation.
- ◆ Endless list of uses, Silage bag cover, Wind-break, Sunscreen and much more.
- ◆ Stainless Steel Grommets allows easy securing of cover.
- ◆ Double stitched hem around the perimeter.
- ◆ Fortress Covers fold easily, making storage convenient.

Fortress Gravel Bags

Fortress Cover on a Silage Bag

- ◆ Easy to carry double handles
- ◆ Zip ties included
- ◆ 36" in length when filled
- ◆ 12 Year warranty on UV degradation.

The Fortress Gravel Bags conform to the pile and along bunker walls, creating a tight and constant seal. The gravel bags also work great along the face of the silage pile to keep air from migrating under the plastic.

End-Caps
